Cautionary Statements with Respect to Forward-Looking Statements

The financial projection is the judgment of our management based on the information presently available. By nature, such financial projection is subject to uncertainty and a risk. Therefore, we advise against making an investment decision by solely relying on this projection. Variables that could affect the actual financial results include, but are not limited to, economic environments related to our business areas and fluctuations in yen-to-dollar and other exchange rates. Commencing in the fiscal year ending March 31, 2009 (and in any interim periods of the fiscal year), the Accounting Standards Board of Japan ("ASBJ") Statement No.12, "Accounting Standard for Quarterly Financial Statements" and the ASBJ Guidance No.14, "Implementation Guidance for Accounting Standards for Quarterly Financial Statements" were adopted. Also, interim financial statements are prepared in accordance with the "Regulation for Quarterly Consolidated Financial Reporting".

Qualitative Discussions on Financial Information and Summarized Consolidated Financial Statements with Footnotes

1. Consolidated Financial Results

Year-to-year performance in retail volume by primary markets for the three months ended June 30, 2008 was as follows. In Japan, retail volume was down 4% year over year to 54,000 units. On the other hand, in North America, retail volume was almost flat year on year at 109,000 units. In Europe, retail volume increased to 93,000 units or up 20% mainly due to contribution of the sales of New Mazda2 (Demio in Japan) and CX-7. In China, retail volume increased by 101% from a year ago to 33,000 units. The positive impact of Mazda3 (Axela in Japan) was the main factor. In other areas, retail volume was up 9% to 69,000 units. As a result of these varying performances by market, the global retail volume was 358,000 units, up 11% from the same period of the prior fiscal year.

Consolidated sales decreased by ¥42.5 billion (down 5%) year on year to ¥771.8 billion. Positive impacts of increases in sales volume were more than offset by the negative impacts of yen's appreciation and changes in accounting standards. Consolidated operating income was ¥28.3 billion, a decrease of ¥ 4 billion (down 12%) year over year. Negative impacts of external factors such as stronger yen and price hikes of raw materials exceeded positive impacts of improvement in sales volume and mix. Operating ROS was 3.7%. The consolidated ordinary profit was up ¥1.7 billion (up 8%) to ¥22.9 billion due to improvement in equity method income and foreign exchange results. Consolidated net income was up ¥12.5 billion (up 504%) to ¥15.0 billion primarily due to the adoption of the accounting standards for quarterly financial statements.

Note: Commencing in the three months ended June 30, 2008, "*Accounting Standard for Quarterly Financial Statements*" was adopted. In the above year-over-year comparison, the financial results for the prior period are based on the financial information that was disclosed in FY2007 First Quarter Consolidated Financial Results released on July 31, 2007.

2. Consolidated Financial Position

As of June 30, 2008, total assets amounted to ¥2,048.9 billion, ¥63.4 billion more than the end of last fiscal year. Also, total liabilities amounted to ¥1,499.0 billion, up ¥67.6 billion from the end of last fiscal year. These increases were due to the adoption of "*Practical Solution on Unification of Accounting Policies to Foreign Subsidiaries for Consolidated Financial Statements*".

Total equity decreased by ¥4.2 billion to ¥549.9 billion from the end of last fiscal year. Equity ratio was decreased by 1.1 percentage points from the end of previous fiscal year end to 26.7%.

3. Qualitative Discussions on Consolidated Financial Forecasts

Forecasts for the six months ending September 30, 2008 and the year ending March 31, 2009 remain unchanged from the prior forecasts that were released on April 25, 2008.

4. Other

1) Significant changes in consolidation scope:

None

2) Adoption of accounting methods simplified / unique to preparing interim consolidated financial statements:

1. Simplified accounting methods

Omission of physical inventory

As of June 30, 2008, physical inventory was omitted. Instead, the balance of inventory as of June 30, 2008 was determined by a rational method to reasonably estimate it based on the information from physical inventory as of March 31, 2008.

2. Unique accounting methods

None

3) Accounting changes in preparing interim consolidated financial statements:

(Accounting Standard for Quarterly Financial Statements)

Commencing in the year ending March 31, 2009 (and any interim periods in the year), Mazda Motor Corporation (the "Company") and its consolidated subsidiaries adopted the ASBJ Statement No.12 "*Accounting Standard for Quarterly Financial Statements*" and the ASBJ Guidance No.14 "*Implementation Guidance for Accounting Standards for Quarterly Financial Statements*". Also, interim financial statements are prepared in accordance with "*Regulation for Quarterly Consolidated Financial Reporting*".

(Practical Solution on Unification of Accounting Policies Applied to Foreign Subsidiaries for Consolidated Financial Statements)

Commencing in the three months ended June 30, 2008, the Company and its consolidated overseas subsidiaries adopted the Practical Issues Task Force ("PITF") No. 18, "*Practical Solution on Unification of Accounting Policies Applied to Foreign Subsidiaries for Consolidated Financial Statements*", issued by the ASBJ on May 17, 2006, and made necessary adjustments in preparing the consolidated financial statements. The effects of adopting this standard on operating income, ordinary income, and income before income taxes in the consolidated statement of income for the three months ended June 30, 2008 were immaterial.

Also, as a result of adopting the PITF No. 18, incentive expenses of overseas consolidated subsidiaries that were recognized in selling, general and administrative expenses in the prior periods are now recognized as a reduction to net sales. For the three months ended June 30, 2008, such incentive expenses amounted to ¥34,625 million, and the effects of this change on the consolidated statement of income for the three months ended June 30, 2008 were to decrease net sales, gross profit on sales, and selling, general and administrative expenses by the amount.

(Accounting Standards for Measurement of Inventories)

Commencing in the three months ended June 30, 2008, the Company and its consolidated domestic subsidiaries adopted the ASBJ Statement No.9 "*Accounting Standards for Measurement of Inventories*" issued by the ASBJ on July 5, 2006 and for inventory valuation changed from cost method based mainly on average method to lower of cost or market method.

The effects of adopting the new standard on gross profit, operating income, ordinary income and income before income taxes in the consolidated statement of income for the three months ended June 30, 2008 were immaterial.

(Change in Accounting for Materials Sold to and Purchased Back from Suppliers after Fabrication)

Through the year ended March 31, 2008, in the consolidated statement of income, the Company accounted for materials sold to suppliers for the purpose of purchasing back from them after fabrication in such a manner that the transactions were recognized in both net sales and cost of sales. Commencing in the three months ended June 30, 2008, however, the Company changed accounting for these transactions to exclude the amounts from both net sales and cost of sales. Under the previous accounting, the Company was emphasizing the contractual condition that the ownership title to the materials transfers through the transactions. However, the Company now emphasizes the substance of the transactions that the materials are purchased back after fabrication.

The effects of this accounting change on the consolidated statement of income for the three months ended June 30, 2008 were to decrease both net sales and cost of sales by ¥43,833 million with no effects on operating income, ordinary income, and income before income taxes.

Also, the effects of this accounting change on segment information are discussed in the applicable section of the notes to the consolidated financial statements.

Additional Information:

(Change in Useful Lives of Fixed Assets)

On April 30, 2008, the Japanese Income Tax Law was revised to implement certain changes to useful lives of fixed assets. As a result, commencing in the three months ended June 30, 2008, the Company and its consolidated domestic subsidiaries changed the useful lives of fixed assets in calculating their depreciation expenses in accordance with the revised Japanese Income Tax Law.

The effects of this change on the consolidated statement of income for the three months ended June 30, 2008 were to decrease operating income by ¥571 million and to decrease ordinary income and income before income taxes by ¥574 million.

The effects of this change on the segment information are discussed in the applicable section of the notes to the consolidated financial statements.
